Dear Jay

Luna Air Purifying Unit

We are writing to let you know that following the installation the Luna Air Purifying unit in our Whitehall Road Residential Care Home 6 months ago we are pleased to confirm that we will be rolling out these units throughout our care homes. The unit has proved extremely successful and beneficial.

Residents have remarked that they no longer suffer from consistent throat irritations and infections and believe this to be as a direct result of a cleaner and healthier air environment. Our support staff have confirmed that we no longer have unpleasant incontinence smells and kitchen staff have also commented that the dining and kitchen no longer mask lingering cooking and food smells.

We are also pleased that condensation is no longer an issue due to the Luna Unit.

We look forward to discussing the roll out to our other services shortly.

Yours sincerely

Dilip Gohil
